Oyo, Nigeria

August 2022

EXPERIENCE

Student Management System Developer

October 2025 – Present

El-Shaddai Baptist Schools

- Designed and developed a full-stack Student Management System to manage student records and academic information.
- Implemented secure user authentication and a centralized database for efficient data storage and retrieval.
- Built responsive interfaces and backend functionalities to support student data management.

ICT Support Intern

January 2025 – June 2025

Lasaco Assurance PLC

- Provided technical support to staff, including computer setup, software installation, and troubleshooting hardware and software issues.
- Assisted in the development, testing, and maintenance of internal applications and websites.
- Managed digital records, assisted with network and system maintenance, and supported smooth operation of the IT infrastructure.

PROJECTS

AI-Based Food Management System (Smart Food Management)

March 2026

- Developed an AI-powered food management system to reduce food waste through demand forecasting and meal planning.
- Built a machine learning model to predict student meal demand using historical meal data, meal type, and attendance patterns.
- Designed a web-based platform with database integration for managing predictions, food inventory, and cafeteria operations.

ResQ

March 2026

- Designed and developed ResQ, a digital platform that streamlines emergency response and incident reporting.
- Built core features for reporting emergencies, managing requests, and improving communication between users and responders.
- Developed a responsive interface and integrated backend services to ensure reliable system performance.

Ayo Game (Python AI Project)

August 2024

- Developed a digital implementation of the traditional Ayo board game in Python, applying object-oriented programming principles.
- Designed game logic including move validation, stone distribution, score tracking, and win-condition evaluation.
- Integrated an AI opponent using decision-making algorithms to enable single-player gameplay.

ACTIVITIES & LEADERSHIP

Babcock University Academic & Career Enhancement Program

Aug 2026 - Sep 2026

Global Innovation & Cultural Immersion Program (GICIP 2026) Participant

- Selected participant in a six-week international innovation, technology and cultural immersion program spanning Germany, Austria, Italy, Vatican City, France and the Netherlands. Engaged with AWS in Munich, Oracle in the Netherlands, SAP, Wolt, TUM Ventures Lab, and the United Nations Office at Vienna. Gained exposure to cloud computing, AI, enterprise technology, digital transformation and entrepreneurship through technical presentations and discussions with industry professionals. Developed cross-cultural communication, professional networking and global collaboration skills across professional and academic environments in six countries.

42 Berlin

Sep 2026

Python Discovery / Piscine Participant

- Completed an intensive one-week Python Discovery program in Berlin, building practical Python skills through individual exercises and team collaboration. Collaborated in a team to develop a Tic-Tac-Toe application selected among the Top 6 projects out of 22 groups, earning the opportunity to present to the wider 42 Berlin community. Earned certification upon completion.

Babcock University

2025/2026

Grace Chapel Graduating Class President

- Led planning and execution of the Grace Chapel Graduating Class Week, overseeing a team of executives and managing event logistics from conception to completion. Secured and managed sponsorships exceeding NGN 2 million, preparing proposals and reports and ensuring transparent accountability for funds received. Coordinated leadership meetings, panel sessions, fundraising, and stakeholder communication with church leaders, guest speakers, and external partners.

Academic Projects

2022 - 2026

Project Lead

- Led multiple software development projects, delegating responsibilities, coordinating team members, and monitoring project progress. Presented project outcomes and collaborated to solve technical challenges.

Volunteer

2024

Coding Instructor

- Taught coding fundamentals to primary school students through interactive lessons. Developed learning materials and guided students through programming exercises, fostering problem-solving skills and interest in technology.

SKILLS

AI & Machine Learning: TensorFlow, PyTorch, Scikit-learn, Demand Forecasting, Data Preprocessing

Programming Languages: Python, JavaScript, Golang, HTML, CSS

Backend Development: Node.js, Express.js, Flask

Frontend Development: React.js, HTML5, CSS3, Responsive Web Design

Databases: PostgreSQL, MySQL

Tools & Technologies: Git, GitHub, Visual Studio Code, Postman, npm

Concepts: RESTful APIs, Object-Oriented Programming (OOP), Role-Based Access Control (RBAC), Database Design, Version Control
